CRS COUNTRY ROAD

Cruisemaster™ CRS builds on the experience of the market leading Cruisemaster™ XT suspension, resulting in a lightweight package that is equally at home on the black top as it is on the dirt roads.

This suspension is designed for the explorer who wants to travel endless dirt roads in the Australian outback but does not plan on negotiating endless corrugations.

The 'single arm' design reduces weight whilst providing a stiff and strong platform with which to support your caravan or camper trailer. Cruisemaster™ CRS features the same King Springs as its bigger brothers and uses 30mm gas charged dampers to ensure maximum control.

Cruisemaster™ CRS gives the explorer the confidence to travel the vast interior of the Australian continent with a dirt road capable lightweight suspension package.
