ATX^{3T}

PREMIUM 3 TONNE SINGLE AXLE SUSPENSION

Australia's Premium Suspension System - ATX, is now available in Single Axle 3 Tonne (ATM). Offering premium features along side maximum payload capacity on a single axle caravan or hybrid camper.

What's New

We have tweaked the design of our ATX arm to allow for this increased capacity. These reinforced arms specifically designed for 3T application can be identified by the welded end cap in place of the Orange Stag Head end cap fitted to the inside of the arm.

Shock Absorbers

ATX 3T is compatible with both the standard fitment M46 shock absorbers or upgrade option of the adjustable M60 shocks for the ultimate suspension set up.

Brake Options

Available with either ABS compatible CruiseMaster™ 12" Electric Drum Brakes or our Premium Ventilated Hydraulic Disc Brakes.

Air or Coil

3 Tonne ATX is available in both ATX Air featuring premium Firestone rolling Sleeve Airbags or ATX Coil featuring X5K Springs by King Springs.

Testing & Development

Engineered, Tested and Built in Australia for the toughest Australian conditions. Including rigorous testing at the AARC Proving Ground.
