

CRUISEMASTER

CRS COUNTRY ROAD

Cruisemasters market leading Country Road Suspension system has evolved. Introducing the CRS²... lighter, stronger, easier to install.

The CRS semi-offroad suspension system quickly became the preferred system for those looking for the quality of an independant arm suspension without the purpose or extra weight of a fully off road system. The CRS² takes the learnings from the previous generation CRS and improves on the system, resulting in a lightweight package that is equally at home on the black top as it is on the dirt roads.

The 'single arm' design reduces weight whilst providing a stiff and strong platform with which to support your caravan or camper trailer. Cruisemaster CRS features the same King Springs as its bigger brothers and uses 30mm gas charged dampers to ensure maximum control.

This suspension is designed for the explorer who wants to travel endless dirt roads in the Australian outback but does not plan on negotiating endless corrugations.

FEATURES

- Light weight fabricated arm
- Weight reducing mounting system
- Twin rate spring system with X5K King Springs
- 155mm ride height
- Electric drum or hydraulic disc brakes
- Camber & Toe adjustment
- 30mm dual tube dampers in single or twin fitment
- Polyurethane bump stops & greaseable bushes
- Built in cable management system
