GENERAL INSTRUCTIONS

It is recommended that only a properly qualified person installs the product and carries out maintenance. If you are not qualified and attempt to carry out such work ensure that all safety equipment is used and safety standards are met.

Ensure that you have read the full Product Manual before attempting to fit the product.

Ensure the Product Manual is kept with the vehicle and that any vehicle owner and/or operator are fully advised on the system and its operation before attempting to operate it.

DO NOT connect any electrical components to the vehicle without preparing the electrical system as per the vehicle manufacturer's instructions. Connecting without preparing the vehicle could lead to component failure, vehicle damage or fire.

If you use a sharp utility knife or razor blade great care must be taken in all cases not to cut yourself during this operation.

The gauge is NOT weatherproof and is best mounted inside the vehicle.

The switches should be mounted in a protected area to minimise the effect of moisture and dirt E.q. in or under a tray, in tool box or

Air compressors get hot - avoid any flammable liquid or burn risk

The air tank is rated to a maximum working pressure of 150 psi (10 bar) and this is never to be exceeded.

Incorrect use of this product can result in damage to the components associated parts and/or the vehicle, which is not covered under warranty.

Ensure suspension airbags are maintained at the stated ride height at all times and maintain the minimum pressure required and never exceed the maximum, as required by the particular airbag product.
