**AXLE CONFIGURATION / RATING ATM (KGS)**

\*The ATM is a critical specification for correct coil spring / bump stop combination selection. The ATM is the total weight of vehicle including full payload. Overstating or understating this capacity could lead to a detrimental effect on the ride, ride height and handling.

- Max tyre diameter 750mm on all configurations

**NOTE:** This is a non-load sharing suspension therefore wheels and tyres need to be rated to 120% of required capacity. Ratings assume a drawbar load of 7 - 12% ATM.

Single Axle		Tandem Axle
