AXLE CONFIGURATION / RATING ATM (KG)

**The ATM is a critical specification for correct coil spring / bump stop combination selection. The ATM is the total weight of vehicle including full payload. Overstating or understating this capacity could lead to a detrimental effect on the ride, ride height and handling.*

- Max tyre diameter 760mm on all configurations

NOTE: This is a non-load sharing suspension therefore wheels and tyres need to be rated to 120% of required capacity. Ratings assume a drawbar load of 7 - 12% ATM.

Single Axle		Tandem Axle
1250	2000	2500
1600		3100

SUSPENSION SETUP

Chassis to Face	170mm	200mm
Stud Pattern	Ford 5	LC6
